Responsible Product Use Policy

1. Purpose

Morepen Laboratories Ltd. is committed to protecting the health and safety of customers and consumers through the development, manufacture, and supply of high-quality pharmaceutical products, as well as protection of the environment through responsible management, storage, handling and disposal. This policy articulates our dedication to minimization of environmental; health and safety risks associated with our products and ensuring customers and consumers have the necessary information and support for safe and responsible use of our products.

2. Scope

This policy applies to all products developed and marketed by Morepen Laboratories Ltd., including finished pharmaceutical products, active pharmaceutical ingredients and healthcare products. It covers all business units involved in research & development, manufacturing, quality assurance, regulatory compliance, distribution and customer support.

3. Policy Commitment

Morepen Laboratories Ltd. commits to:

- Uphold strict adherence to Good Manufacturing Practices (GMP), global regulatory requirements such as Central Drugs Standard Control Organization (CDSCO), World Health Organization (WHO) and International Council of Harmonization of Technical Requirements for Pharmaceuticals for Human Use (ICH guidelines), and internal quality standards to deliver safe products in addition to following all applicable legal requirements.
- Proactively identify and mitigate any potential environmental, health and safety adverse matters that are associated with material sourcing, formulation, manufacturing, packaging, storage, and distribution and disposal, with an emphasis on end of product life cycle use.

- Foster a culture of continuous improvement and accountability in environmental, health and safety management.

4. Objectives

- **Product Safety and Quality Assurance**
All products shall meet stringent quality criteria ensuring safety, efficacy, and consistency. Regular audits and inspections by regulatory authorities and customers to ensure continuous compliance.
- **Risk Assessment and Prevention**
Systematic risk assessments are conducted at all stages from R&D to post-market to identify adverse matters and implement controls to prevent or minimize risks to customers as well as environment.
- **Clear Customer Communication**
Provide accessible, comprehensive product information including labelling and packaging and material safety data sheets that detail indications, contraindications, dosage, side effects, handling, storage and disposal instructions.
- **Effective Pharmacovigilance and Incident Reporting**
Establish a robust system for collecting, monitoring and analyzing adverse event reports. Ensure timely investigation, root cause analysis and corrective actions to protect customer safety.
- **Training and Capacity Building**
Conduct regular training programs for employees on customer health and safety requirements, regulatory changes, and ethical standards to reinforce shared responsibility inclusive of measures to be taken for the protection of environment.
- **Regulatory Compliance and Transparency**
Adhere to all applicable compliance requirements and guidelines in every jurisdiction where products are marketed and sold. Maintain transparent communication with key stakeholders with special mention to investors, regulatory authorities and customers.
- **Sustainability and Ethical Responsibility**
Promote ethical practices that prioritize the welfare of customers and stakeholders while aligning with broader sustainability goals.
